

Coastal Committee

- Coastal Committee Mission is to support Coastal Advocacy
 - ◆ develop policy guidance
 - ◆ build communication between Club entities
 - ◆ mobilize California Sierrans to support coastal protection

Coastal Committee

- Issues related to causes of climate change
 - ◆ Oil and gas production and distribution
 - Drilling, pumping, transporting, refining, and burning
 - ◆ Coastal-dependent uses like fishing and shipping
 - ◆ Coastal power plants

Coastal Committee

- Issues related to impacts of climate change
Sea Level Rise is main impact on coastal resources
- Local Governments, businesses, and citizens respond to sea level rise with development
- That development causes more impacts to coastal resources

Coastal Committee

- Local governments regulate coastal development in accordance with their LCP
- An LCP is a Local Coastal Program
- It consists of a Land use Plan and an Implementation Plan
- It must be certified by the Coastal Commission

Coastal Committee

- LCP Updates
 - ◆ Most LCPs are old, and do not deal with the impacts sea level rise
 - ◆ The Coastal Commission has given four rounds of grants to local governments to update their LCPs
 - ◆ These usually include a vulnerability assessment, an adaptation plan, and changes to the LCP
 - ◆ See www.coastal.ca.gov/lcp/grants/
